Twenty-four hours coming from Boston to Barre, a trip that usually takes about seven hours, was the experience of a traveling man who arrived in this city this morning after leaving Boston yesterday morning. According to the man's story the train was running late all the way and was first held up for several hours by the washout at Roxbury and after they finally got by this they were again held up by a landslide near the fair grounds at Northfield. He arrived at Montpelier at seven this morning, and took the electric to Barre, arriving here an hour before the branch train which was supposed to meet his train at the Junction. The 3:35 train this morning pulled in at 8:30. A special train was made up in the yard here to go to Williamstown and back before the 8:10 train, which left here for the Junction at 8:45.

Shakespeare's powerful tragedy, "King Lear," is at the Theatorium. The great work gives the lovers of the drama a fine chance to witness this strong tragedy. The acting is perfect and follows the book very closely.

State Foresters A. F. Hawes was a visitor in the city yesterday. Previous to coming to Vermont Mr. Hawes was in the forestry department of Connecticut for five years. Although the new forestry law in Vermont has been in effect but a short time, Mr. Hawes says a healthy interest is being manifested in it, and the department has already been called upon for 100,000 trees to be set out this year. These trees, mostly white pine, are furnished at their cost to the state, or \$4.50 a thousand. The father of Mr. Hawes was principal of Goddard seminary about thirty years ago, and Mr. Hawes' mother was a graduate of the seminary.

Paint Durability

DEPENDS UPON

Purity, Formula and Grinding.

A GOOD THING

ADULTERATED PAINT is short lived. B. P. S. Paint is pure lead, zinc and linseed oil paint. No "quick-process" or adulterated lead; no "new process" oil or petroleum mixture, common in ordinary paint.

Guess-work formula means repainting. B. P. S. Paint is made on a formula which is known to give satisfactory results—that is giving satisfaction today, and has for years. No guess work by theorists—but practical paint making by practical paint men.

Coarse, gritty paint is not durable. Lack of proper mixing and grinding means poor working, covering and wearing qualities. Powerful steam

paddles mix B. P. S. Paint with absolute thoroughness, and the pigment is then crushed to the finest possible degree in especially constructed machinery. This produces a smooth, fine material, free from lumps and grit, that gives the best possible results in easy-working qualities, covering and spreading capacity, fine finish and durability.

B. P. S. Paint, on account of its durability, is the most economical that can be secured.
